

Ecology seminar

Each **Tuesday at 4.15 pm, lecture room B1 (Branišovská)**.

The Department of Botany, University of South Bohemia, invites colleagues to attend the weekly seminars (in English)

23rd October: **Carlos P. Carmona** [Tartu University]: Towards a probabilistic approach to integrate functional diversity and species pools

30th October: **Duccio Rocchini** [University of Trento - Fondazione Edmund Mach]: Biodiversity from space: theory, algorithms, drawbacks

6th November: **Petr Keil** [German Centre for Integrative Biodiversity Research (iDiv), Leipzig]: Integrating ecological data and patterns across spatial scales - from local plots to continents

13th November: **Robert R. Junker** [University of Salzburg] Species interactions and traits reveal associations between the Grinnellian and Eltonian niche in regional and local plant-pollinator communities

20th November: **Filip Kolář** [Charles University, Praha and University of Innsbruck]: Where ecology meets genomics: Adaptation of *Arabidopsis arenosa* over 2500 altitudinal meters

27th November: **Karel Prach** [University of South Bohemia and Institute of Botany CAS]: Vegetation succession at broad spatial scales

4th December: **Leonardo Ré Jorge** [University of South Bohemia]: Trophic specialization of tropical herbivore insects: Measurement, drivers and response to gradients

11th December: **Harmony Dalgleish** [College of William and Mary, Williamsburg, VA]: Herbivory and functional traits affect the demography of *Ascleipas syriaca*

More info: Francesco de Bello (fradebello@prf.jcu.cz) and Jan Lepš (suspa@prf.jcu.cz), seminar organizers. **Check for possible changes on the Department of Botany webpage** (<http://botanika.prf.jcu.cz/seminareEco.php>)!

Location: The lecture room B1, Faculty of Science, University of South Bohemia, Building B, Branišovská 31, České Budějovice.
