

M. Rejmánek: Globální oteplování, změny krajín a ztráty biodiverzity

(Živa 2020, 5: 210–214)

Citovaná a další použitá literatura (citace nejdůležitějších publikací jsou vtištěny **tučně**).

Exponenciálně rostoucí počet publikací o globálním oteplování a jiných změnách klimatu se stává značně nepřehledným. Existuje na příklad více než 10 časopisů věnovaných výhradně, nebo téměř výhradně této tématice. Pokusil jsem se proto vybrat a roztřídit alespoň ty nejdůležitější prameny podle témat, kterými se zabývám v mém článku. Jsou to prameny vesměs velice recentní. Neznamená to ale, že ke starším publikacím se již nemusíme vracet. Mnoho důležitých starších publikací je možno dohledat pomocí jednotlivých seznamů citované literatury.
